4	Bank account or service	2,026	11.44%
5	Credit card	1,999	11.29%

'Complaints distribution' nearly exactly the same

Further investigation is necessary to understand why New Jersey and Maryland had disproportional high number of complaints (compared to population size)

Results - Complaints Comparison between Equifax and Experian

Equifax			
Rank	Issue	Number of Complaints	Percentage of Total (from Equifax)
1	Incorrect information on credit report	22,538	70.81%
2	Credit reporting company's investigation	3,762	11.82%
3	Unable to get credit report/credit score	3,404	10.69%
4	Improper use of my credit report	1,050	3.30%
5	Credit monitoring or identity protection	940	2.95%

Experian			
Rank	Issue	Number of Complaints	Percentage of Total (from Experian)
1	Incorrect information on credit report	21,933	70.97%
2	Credit reporting company's investigation	3,913	12.66%
3	Unable to get credit report/credit score	2,609	8.44%
4	Credit monitoring or identity protection	1,204	3.90%
5	Improper use of my credit report	1,109	3.59%

'Issues distribution' nearly identical in both companies

It might suggest that the problem is within the sector (credit reporting), not necessarily with specific companies

Results - Complaints over Time

From 2012 to 2015:

Complaints

+ 132.5%

Consumer disputes

+ 107.5%

Further understanding of dispute process is necessary to investigate this difference

It might be related to the fact that number of complains of credit reporting agencies grew over time

Conclusions

Conclusions

Full data range (01/12/2011 – 25/04/2016)

- Mortgage was the product with more complaints (33.54%)
 - With loan modification (collection, foreclosure) and loan servicing (payments, escrow account) representing 84.50% of it
- Bank of America was the company with more complaints received (10.07%)
 - Mortgage was their most complained product (64.70%)
- California was the state with more complaints (14.70%), but also the one with largest population in U.S, though
 - New Jersey and Maryland, when compared to population sizes, were disproportionally high in number of complaints (4.03% and 3.18% respectively)
 - When compared to California, complaints distributions were nearly identical, though

Evolution throughout time (From 2012 to 2015)

- Number of complaints increased 132.50%
 - Monthly average between January and April was 14.5% larger than total monthly average
 - “Small” seasonality effect, causes not clear
 - Debt collection and Credit reporting had the largest increases
 - Led by Equifax (+1833%) and Experian (+1394%)
 - Both nearly identical in issues distribution
